**Clean Version of Replacement Claim**

17. A system for proofing electronic documents delivered over a network, comprising:

A<sup>1</sup> a plurality of electronic documents in portable document file format:

a computer connectable to the network for receiving the plurality of portable format documents together with at least one associated proofer identifier;

a program executing on said computer for assigning a version number to each of the plurality of received portable format documents; and

a database accessible by said computer for storing the documents and version numbers;

said computer for receiving a request, from a proofer presenting the proofer identifier, to review a portable format electronic document;

said program for retrieving and formatting a current version of the requested document for display;

said computer for receiving a version command from a proofer presenting the proofer identifier;

said program for interpreting the version command to replace the current version of the document with a different version of the portable format electronic document;

wherein said program retrieves and formats multiple versions of the requested document for simultaneous display.
